

WINDOW COVERING – BEHAVIOR CONTROL

- AUTHORITY:** Administrative Directive
- RESCINDS:** Procedure Manual Item 3-1-051, dated 06/13/18 (Major Revision)
- FORMS:** None
- PURPOSE:** To establish guidelines for the use of window coverings at Juvenile Hall and the Youth Leadership Academy, and to develop a uniform method and review of their use.

I. GENERAL INFORMATION**A. Definition**

1. The use of a window covering over the outside of a room window is appropriate only in the following circumstances:
 - a. When a youth's behavior is detrimental to others in the unit. For example, the youth is inciting other youth to participate in a riot, threatening to harm others or is continuously making sexual gestures to others. The use of a window covering will only be for the period of time necessary to bring his/her behavior into compliance with clear and stated expectations.
 - b. To ensure privacy/modesty, when necessary. When possible, the use of the window covering is to be switched equitably between the population of youth in the unit. Window coverings may remain up for privacy/modesty for long periods, with Supervising Juvenile Correctional Officer (SJCO) approval, if youth in their rooms have a clear and continuous view of toilets or shower stalls.

Staff should only cover the amount of door window necessary to provide the needed result.

II. PROCEDURE

- A. Prior to use of a window covering as a tool, staff must explain to the youth why a window covering is being used. If it being used for behavioral reasons, staff must clearly explain to the youth what behavior is expected before the window covering will be removed. Additionally, the youth should be placed on Behavioral Room Confinement (BRC). Refer to the Procedure Manual Item (PMI) 3-1-027 (Room Confinement) regarding the procedure for BRC.
- B. Document the reason for the use of the window covering in the Integrated Case Management System (ICMS).

- C. Staff must make a direct visual observation safety check of every youth at staggered intervals not exceeding ████ minutes when a youth is in his/her room. All safety checks must be recorded in ICMS.
- D. Conduct follow-up counseling within one (1) hour or sooner if the youth appears to be ready to calmly discuss the issue. If after one hour, the youth remains un-amenable to counseling or refuses to comply with behavior expectations the Unit SJCO/Duty Officer must be apprised of the use of the window covering.
- E. When the use of a window covering and room confinement exceeds two (2) hours, the Unit SJCO/Duty Officer must review the situation with unit staff, extend the use of the window covering and room confinement, and contact the Clinical Evaluation and Guidance Unit (CEGU) for consultation regarding the youth's emotional stability.
- F. At least every one (1) hour thereafter, the Unit SJCO/Duty Officer will evaluate the situation and will direct unit staff to make an entry in the unit logbook regarding justification for continuing the use of window covering and room confinement at the time of each review.
- G. Throughout the confinement period, staff will attempt to counsel with the youth at least every hour in an effort to modify his/her behavior so that the window covering may be removed and room confinement ended. Each counseling attempt and the youth's response must be recorded in the logbook.
- H. If the youth remains on Window Covering Status and room confinement status at the end of the shift, address the situation in the shift summary and include pertinent information for staff on each succeeding shift.
- I. At any time a youth is sleeping, the window covering will be removed from the window.
- J. Room confinement shall be terminated as early as possible consistent with a resolution of the circumstances requiring the imposition of the status. If it appears necessary to extend the room confinement in excess of four (4) hours, authorization must be obtained by the Division Director, Assistant Division Director, AIC or his or her designee every four hours thereafter and documented in ICMS Logbook.
